

**VertexFX A.M.-P.M. Fixing plugin** is new strategy specially for Gold business to allow your Gold Shop Dealers to hedge their physical trades as limit orders (Buy Limit/ Sell Limit) while the market closed or even at stopped price, as example at specific time once the London Market open one time only (Hit one price only) the system will move these limit orders to market order according to moved price.

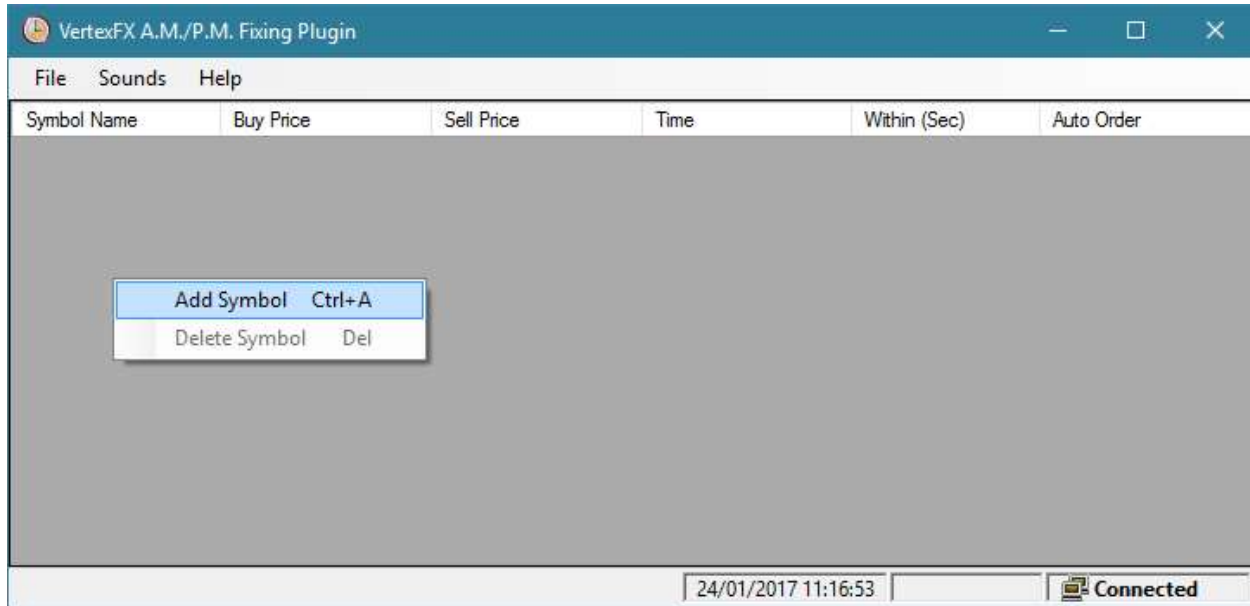

This plugin will monitor all limit order that will be done from the gold shop dealers at agreed to be made at specific parameter, and the plugin will move these limit order according the parameter to new position at that specific time parameter manually, so the dealer or the trader will get his limit order at the market price at that time.

Let us follow these steps in order to configure VertexFX A.M.-P.M. Fixing plugin.

- 1- Open the plugin and put your dealer login info that has a privilege to monitor specific group of clients and symbols.

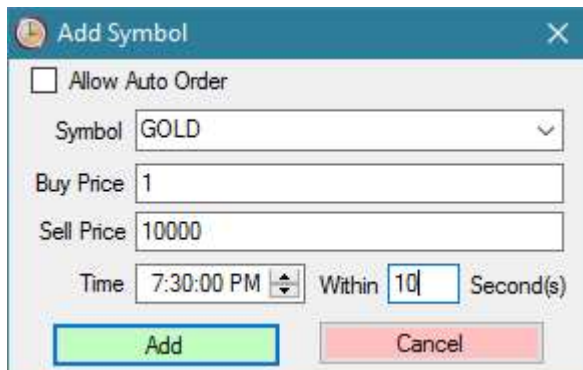

2- The right click no in the screen and choose Add Symbol as new rule:

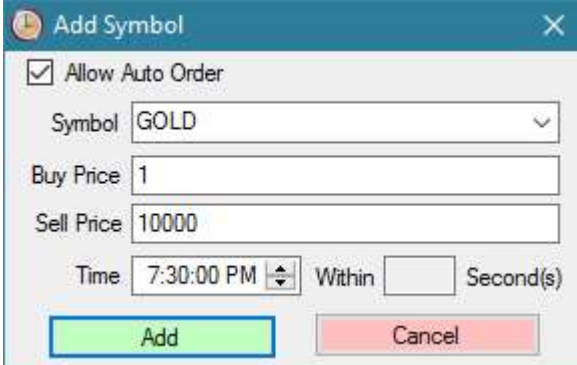

3- Add Symbol screen will be appeared for you, to add the symbol name that you want to monitor, then you need to agree with your client that they need to make Buy Limit order at 1 price as example and Sell Limit order at 10000 price.

Then you need to choose the time that you want to move those Buy limit orders that has 1 price or Sell Limit orders that has 10000 price.

Within field allows the plugin to monitor any first movement price before that time parameter within 10 seconds and after 10 seconds, so the plugin will move all limit orders as market order using the first price will come within this perdio.

- 4- You can disable the Within field by enable Allow Auto Order option, so the plugin will move all limit orders to opened position at specific time that you already configured, in the screen bellow is 07:30:00 PM, if there is no movement at that time, it will not do any thing.

**Add Symbol**

Allow Auto Order

Symbol: GOLD

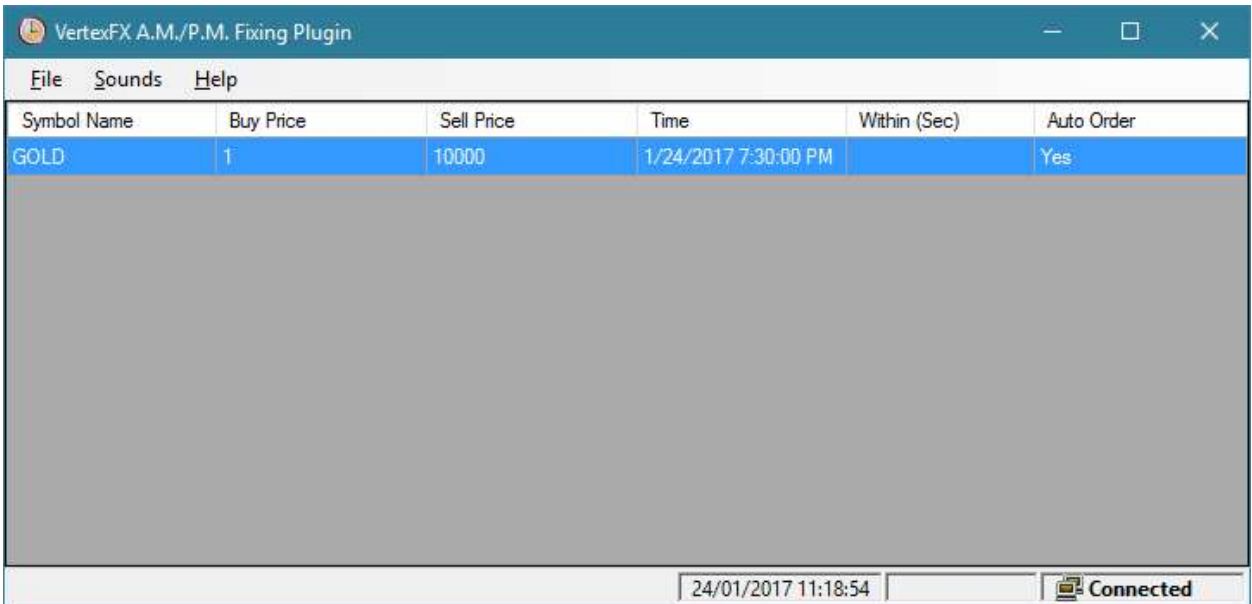

Buy Price: 1

Sell Price: 10000

Time: 7:30:00 PM Within: [ ] Second(s)

**Add** **Cancel**

- 5- Keep the plugin running to monitor all limit orders and keep watching your trader's position opening.
